Letter of Acceptance

Paper ID: ICSSCNA-977

Paper Title: Prakriti: Human Body-type Identification to Recommend Lifestyle using IoT and ML

Author Name(s): Mahesh Pawaskar, Suraj Vishwakarma, Shravan Thakur, Sameer Singh, Ritesh Singh

Dear Author(s)

This is to inform you that the above-mentioned manuscript submitted to the **International Conference on Signal, Systems, and Computing for Next-Gen Automation (ICSSCNA - 2026)** held during **May 4-6, 2026** at Ramachandra College of Engineering (RCE), Eluru, Andhra Pradesh, India, has been accepted.

International Conference on Signal, Systems, and Computing for Next-Gen Automation (ICSSCNA - 2026) aims to provide an interdisciplinary platform for researchers from both academia and industries and lends itself to the integration of recent research works in the field of development and deployment of Multi-Agent Systems and promote agent-oriented approach and tools to solve the potential challenges in collaborative applications

Please feel free to contact us if you have any questions or require further information regarding the conference. Congratulations and we anticipate an engaging and productive conference.

Regards,

Conference Chair,
ICSSCNA 2026

Review Comments

Comments 1:

1.The manuscript lacks sufficient novelty and clear differentiation from prior work
2.Problem formulation and objectives require clearer definition
3.Methodology description is incomplete and limits reproducibility
4.Technical depth is insufficient for the expected conference standards
5.Literature review is limited and misses several recent key studies
6.Experimental validation is weak and lacks rigorous benchmarking
7.Results are presented without adequate statistical or analytical support
8.Figures and tables need significant improvement in clarity and labeling
9.The manuscript requires substantial language and structural revisions
10. Remove the reference generated using AI (For ex: 1,2,3,4,10). It is suggested to organize the Conclusion and future scope section much better. This section should be presented in one 250-300 words paragraph. All the figures and tables should be numbered, captioned and cited in the article content (for example, “As shown in Fig. 1, Figure 2 shows, As shown in Table I, Table II demonstrates etc.”).
